	<p>f) The weighting of the BRIC countries upon launch of the Fund is made on the basis of the Investment Manager's market assessment at that point in time. At the beginning of each calendar year, the Investment Manager has the option of analysing the relative performance of the BRIC countries in the previous calendar year, in order to aim at an approximate balance of the BRIC countries in the Fund, with effect from the start of the respective calendar year. This investment strategy has the objective of utilising statistical findings on the relative development of different national economies with regard to each other ("mean reversion effect"). This may result in increased restructuring within the Fund at the start of the calendar year. The quotas of the individual BRIC countries, as would be obtained from the statistical findings, may be exceeded or not reached (depending on the market situation).</p> <p>g) Within the remit of the Exposure Approach, it is permissible that the limits described in letters a) and b) above are not adhered to.</p> <p>h) The limits listed in letters a) and d) are not required to be adhered to in the last two months before liquidation or merger of the Fund.</p> <p>i) Due to the Fund being marketed in Taiwan and Hong Kong, the Additional Investment Restrictions as described under</p>
